

onocoy Brings Decentralized GNSS Innovation to FIRA 2025

February 4–6, 2025 | Toulouse, France

onocoy is thrilled to announce its participation at World FIRA 2025, where we'll showcase our cutting-edge, community-driven GNSS RTK network that's transforming agriculture with high-precision navigation solutions.

Revolutionizing Precision Agriculture

The onocoy network provides highly accurate GNSS RTK correction data, delivering centimeter-level precision for optimized planting, fertilizing, and harvesting. Designed for seamless integration, onocoy leverages standard GNSS RTK hardware and communication protocols, ensuring compatibility across a wide range of equipment and service providers.

Key benefits of the onocoy network include:

- ✓ Centimeter-level precision to support advanced farming operations.
- ✓ Sustainable solutions to minimize waste and conserve resources.
- ✓ Affordable, flexible pricing based on fixed costs per data stream, irrespective of the number of connected devices.

Ensuring Data Quality and Reliability

onocoy prioritizes data quality through rigorous performance monitoring. The network evaluates parameters such as satellite coverage, signal integrity, and basestation uptime. In the event of issues, users receive timely updates to maintain confidence in data reliability.

A Decentralized and Scalable Network

As a community-based GNSS RTK network, onocoy empowers individuals and businesses with suitable hardware to contribute data, enhancing local and regional coverage. This decentralized approach creates a robust, scalable network capable of supporting diverse agricultural applications, including autonomous robotics, precision farming, and more.

Join us at FIRA 2025

We invite you to visit us at Booth 7 during FIRA 2025 to learn how onocoy's innovative GNSS solutions can transform your agricultural operations. From sustainable farming to cutting-edge robotics, discover why onocoy is leading the way in decentralized navigation technology.

For additional information or to schedule a meeting during FIRA 2025, please contact us via our Contact Page: www.onocoy.com/contact, or visit our socials:
